

For 24 Hour Operation

Setting the same On and Off times may cause the unit not to run. An example:

Mon - Fri Flow 1: 6:00 AM Time On and 6:00 AM Time Off
running at XX%.

The unit will turn on and off at the same time and will not run.

The recommended schedule for 24 hour operation is by using both Mon - Fri or Sat - Sun Flows. An example:

Mon - Fri Flow 1: 7:00AM Time On and 7:00PM Time Off
running at 40% Flow

Mon - Fri Flow 2: 7:00PM Time On and 7:00AM Time Off
running at 40% Flow

Sat - Sun Flow 1: 7:00AM Time On and 7:00PM Time Off
running at 40% Flow

Sat - Sun Flow 2: 7:00PM Time On and 7:00AM Time Off
running at 40% Flow
